PUMP UP YOUR GAS DETECTION PROGRAM

VENTIS™ MX4

Configured for your safety, the Ventis™ MX4 multi-gas detector takes your gas detection program to the next level.

- Detect from one to four gases with a wide range of sensor options

- Draw samples from up to 100 feet with an optional, integrated sampling pump

- Gain increased instrument visibility with a safety orange overmold

- Realize true portability with multi-gas protection in single-gas size

- Use the extended range battery for up to 20 hours (without pump)

- Discover a better way to do gas detection with the Ventis on iNet®

INDUSTRIAL SCIENTIFIC

No matter the industry, workplaces are becoming more complex. Demands for increased productivity and efficiency persist to become the focal point of operations. In order to meet such high demands, employees working in potentially hazardous environments require a high-quality, reliable gas detector that above all else, keeps them safe.

The highly configurable Ventis is specifically designed to meet unique gas detection needs while maintaining worker safety. Available with or without an optional, integral pump, the Ventis is ideal for confined space or personal monitoring. In addition to multiple sensor and battery configurations, you can choose from a robust suite of accessories. Each of these options for configuration ensures that when you receive your monitor, you receive only what you need. Best of all, the Ventis is compatible with iNet, enabling increased efficiency, safety and reduced costs.

INCREASED EFFICIENCY

Focus on what is core to your business while we handle your gas detection program. As the Gas Detection People, gas detection is not only what we do - it's what we love to do.

INCREASED SAFETY

On average, gas detectors go into high alarm once every ten days. Do you know how many high alarms your facility had? iNet gives you information and tools to fix problems before they happen.

REDUCED COSTS

A gas detector's purchase price does not include continuous maintenance and servicing expenses. Eliminate unnecessary ownership and maintenance costs by subscribing to Gas Detection as a Service.

HOW GAS DETECTION AS A SERVICE WORKS

1. Operators dock gas detectors owned by Industrial Scientific.

2. Docking stations perform bump tests, calibrations and record keeping.

3. iNet Control provides visibility into your gas detection program via the Internet.

4. iNet emails real-time alerts and status reports.

5. When iNet detects a problem, Industrial Scientific rushes a replacement gas detector to you.
