

SPETTRADIOMETRO PORTATILE SP-H350

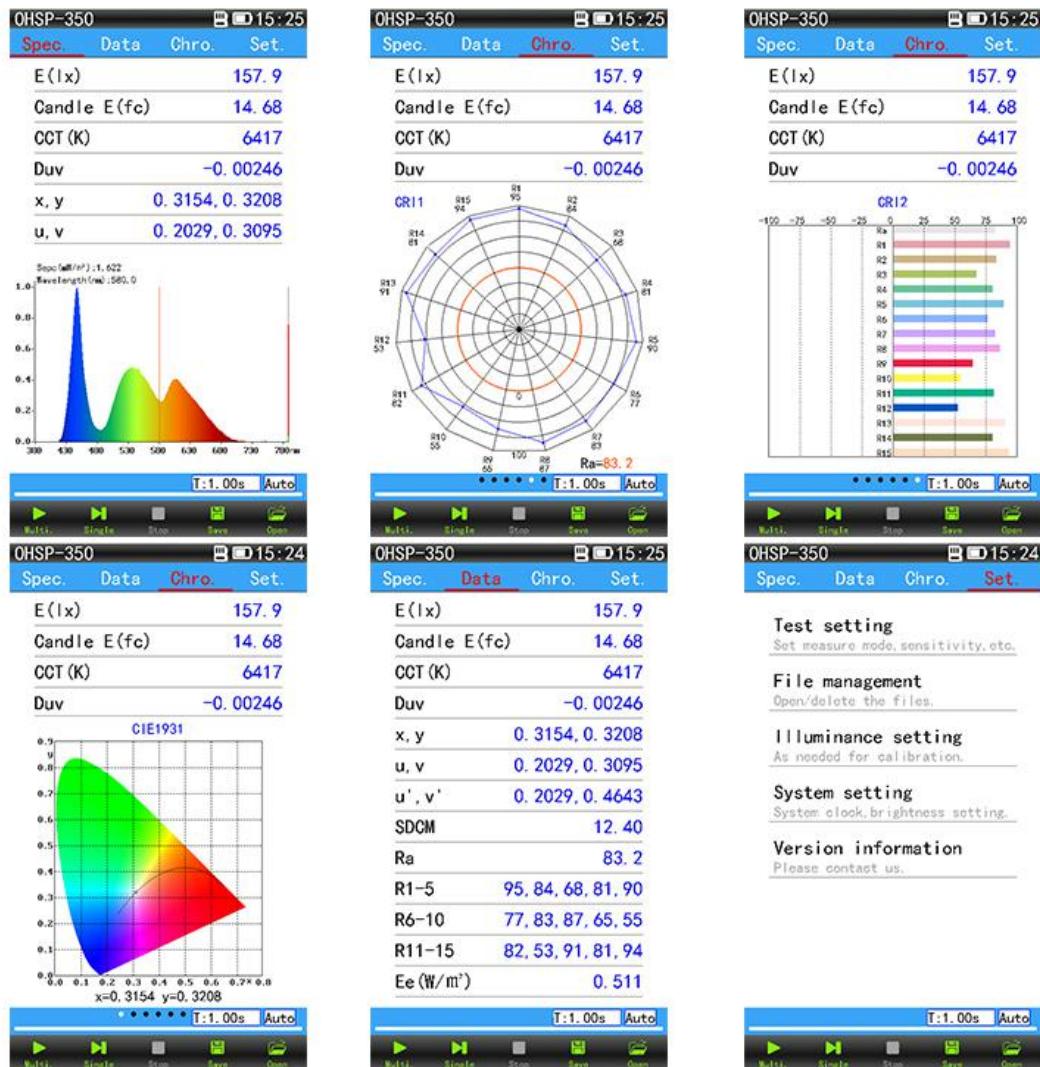

SP-H350 handheld spectral colorimeter illuminance meter set of measurement function Spectrum, illumination, chromaticity, light flicker in one. Using 5 inch screen, the measurement parameters and curves are displayed in real time. It is convenient to use and can be directly tested in the lighting field., Not only measurable LED wide spectrum light source, but also can measure the narrow spectrum light sources, such as CFL, HID, and so on., It can also be used to test the environmental light of stage design, building light, plant growth lamp, engineering application and so on.

1、Advantages

- ▲ Long telephoto optical system, the optical resolution of 2nm, a wider wavelength range, mainly measure the light source;
- ▲ automatic zeroing technology and Electronic shutter Technology, Integral time 50 μ s ~ 10000ms ,both stronger and weaker light signal can be measured;
- ▲Fast switchgear, one key test;
- ▲5 "IPS high definition LCD touch screen;
- ▲Large battery capacity, Test usage time more than 24 hours time;

Test interface:

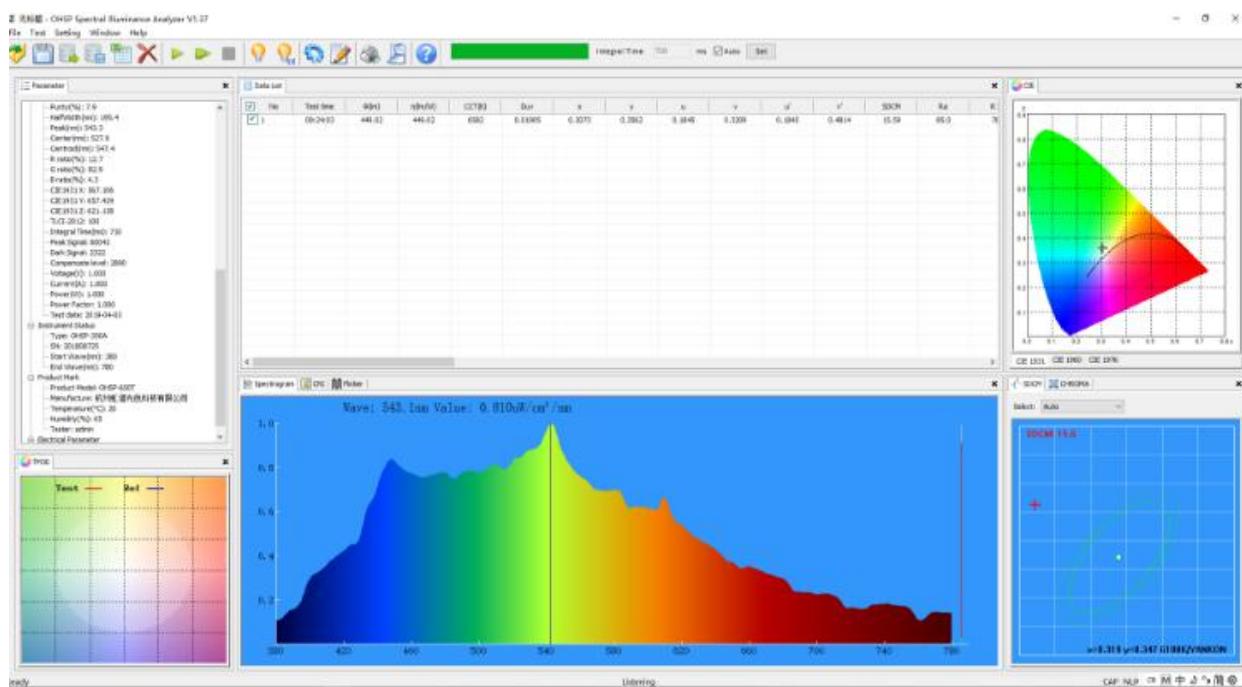

Measuring parameters:

1. CCT Tc (K) and blackbody deviating from Duv
2. light illumination E (LX), candlelight E (Fc) radiation illuminance Ee (mW/cm²)
3. chromaticity coordinates (x, y), (U, V), (U', V')
4. relative spectral power distribution P (lambda)
5. color rendering index Ra, Ri (i=1 ~ 15)
6. color tolerance (SDCM, CIE and MacAdam rectangle u 'V' round)
7. Dominant wavelengths, peak wavelengths, central wavelengths, centroid wavelengths, and half width
8. light and dark visual ratio S/P
9. color purity, red ratio, green ratio, blue ratio, CIE1931 three basic color stimulus value X, Y, Z

A、technical indicators

Light splitting platform	Long focal length optical system	Range of illuminance measurement	5-200000lx
(FWHM)	2nm	Range of color temperature measurement	1000-10000K
spectral resolution	0.2nm	x,y Accuracy	±0.001
Senor	CCD	x,yrepeatability	±0.0005
Sensor array points	3648	Accuracy of illumination	±4%
Zeroing mode	Auto zeroing	Chromaticity accuracy	±1.5% @ Under the condition of standard A light source 2856K and illuminance 10000lx
Integral time	50us-20000ms	Wavelength accuracy	±0.5nm
LCDDisplay	5 "IPS high definition LCD touch screen	Wavelength data output interval	1nm
R.P.	480X854	AD Resolving power	16bits,250kSPS
Measurement mode	Single / continuous	Language	Simplified / traditional / English
Exposure mode	Auto / manual	File save	8GB SD Card
Spectral display mode	6 optional display parameters	Data output interface	SDCard/USB2.0
	Spectral distribution graph	size	163x81x25.8mm
Data display mode	All parameters can be displayed up and down	Probe window	Ø 10mm
Pattern display mode (Multiple patterns)	CIE1931 chromatic diagram	Weight (contains batteries)	500g
	CIE1960 chromatic diagram	Operating temperature	0~35°C
	CIE1976 chromatic diagram	Storage temperature	-10~40°C
	SDCM Color tolerance	Continuous working time	>10hours
	Circular graph of color rendering index	Battery capacity	4000mAh
	Bar graph of color rendering index	Whole machine structure	All aluminum alloy engraving
